Hazardous Weather

High wildfire danger this week

A very warm, dry and breezy pattern will linger through Wednesday before cooler temperatures arrive later in the workweek.

- The dryline is expected to move east through the Rolling Plains each afternoon.
- Temperatures will warm into the 80s and low 90s across the area.
- The relative humidity will fall into the 5 to 15% range west of the dryline.
- Southwesterly winds of 15 to 25 mph each afternoon.

Lubbock, TX

Unseasonably warm, dry and breezy conditions will prevail through Wednesday before cooler temperatures close out the work week. Wildfire dangers will be a concern today through Wednesday, and perhaps again on Thursday.

National Weather Service Fort Worth

This Afternoon

There is a very slight chance of storms late this afternoon. If storms develop, they will likely become severe.

Chance of storms

10%

Hazards if storms occur:

- Large Hail
- Damaging winds

@NWSFortWorth
 NWSDallasFortWorth
 NWSFortWorth

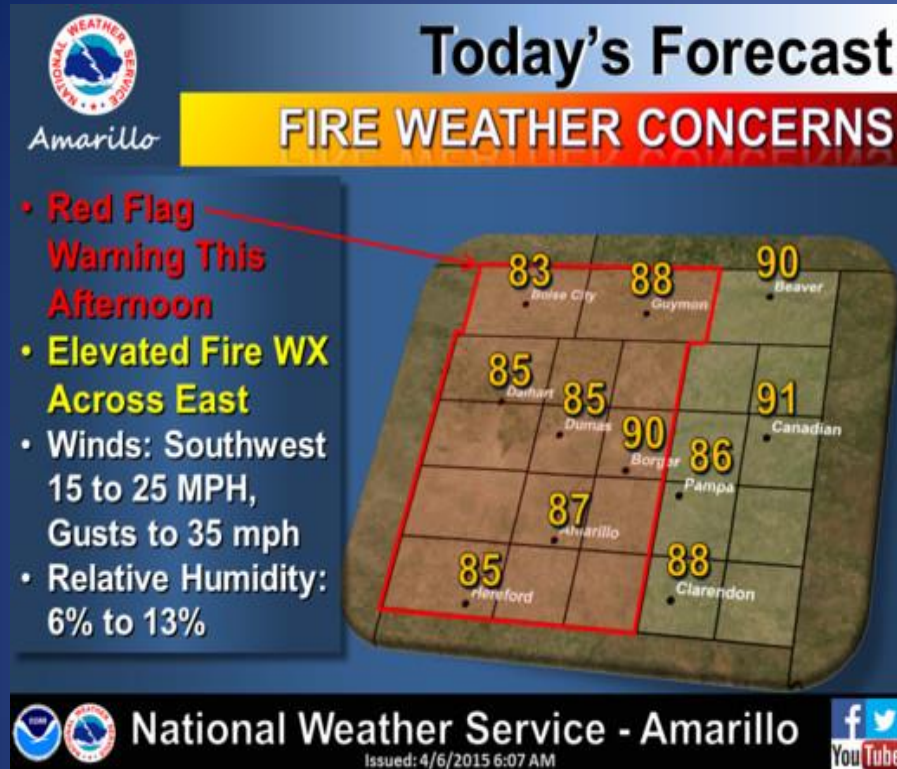

638 AM CDT
Mon Apr 6 2015
National Weather Service
Fort Worth, TX

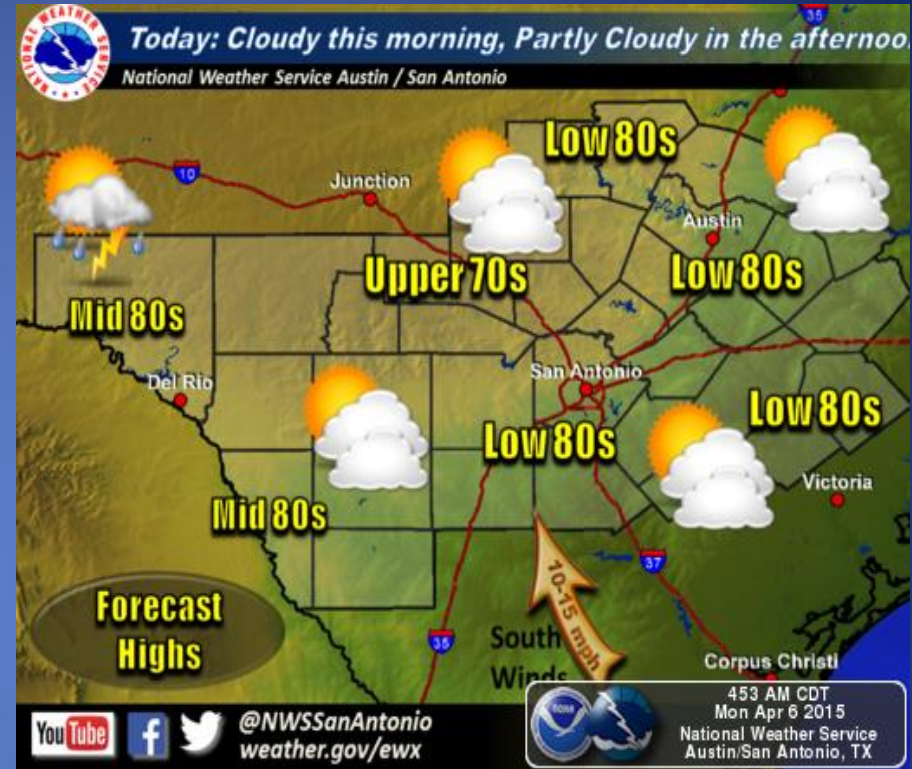

There is a low chance of thunderstorms late this afternoon and early this evening mainly northwest of a Breckenridge to Bowie line. Thunderstorm development will be limited due to the cap, but if storms do develop, they will likely become severe. The main hazards at this time appear to be from large hail and strong damaging winds. Frequent cloud-to-ground lightning will also be possible. Otherwise, expect a warm and humid day with temperatures in the upper 70s to mid 80s across North and Central Texas. Breezy south winds can also be expected

Hazardous Weather

Elevated and critical fire weather conditions are expected across the Texas and Oklahoma Panhandles Today. Well above average high temperatures will drive relative humidities into the single digits and low teens across the entire area by this afternoon. The strongest winds of 20 to 25 mph with gusts up to 35 mph will be across the western and central portions of the combined Panhandles. This area is under a Red Flag Warning this afternoon and evening. The eastern portion of the combined Panhandles will see slightly lower wind speeds to keep fire weather conditions at the elevated category.

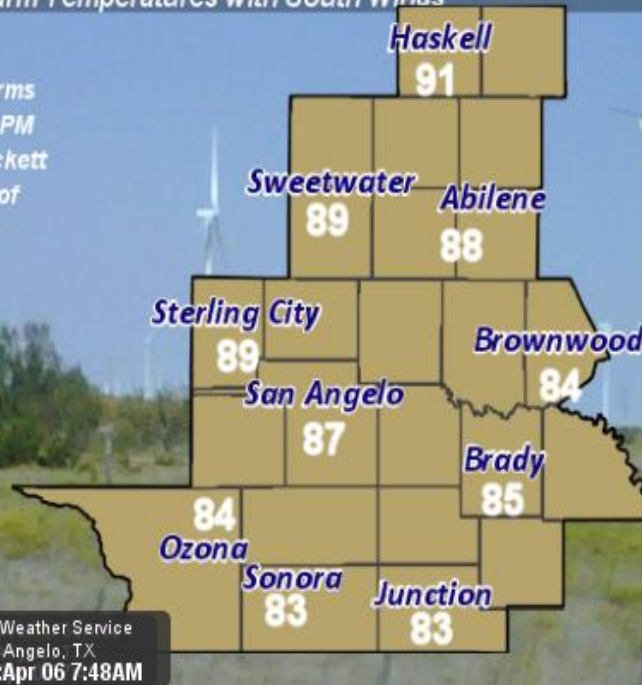

Cloudy skies will prevail this morning before seeing some sunshine during the afternoon hours. Highs will range from the upper 70s in the Hill Country to the middle 80s along the Rio Grande. Late in the day a few strong thunderstorms may form over West Texas and northern Mexico. These storms may move into the far western sections near the Rio Grande by late afternoon and evening. South winds of 10 to 15 mph will prevail across all of South Central Texas...a few gusts near 20 mph are possible.

Hazardous Weather

This Afternoon

Warm Temperatures with South Winds

Isolated thunderstorms are possible after 4 PM west of Ozona (Crockett County), and north of Interstate 20

National Weather Service
San Angelo, TX
Updated: Apr 06 7:48 AM

Warm temperatures are expected this afternoon, with south winds. Isolated thunderstorms are possible after 4 PM, to the west of Ozona (Crockett County) and north of Interstate 20.
